

P300 Series Portable PA System

Fairfield Audio

P300

The Fairfield Audio P300 is a convenient self contained rugged portable PA system designed for a wide variety of uses. With a weight of only 7 lbs everyone from the tour group leader to the Auctioneer find this unit the perfect tool for the job. With the optional floor stand this unit is not only mobile but sets up outdoors in an instant. The unit is moisture resistant and therefore works well in pool areas and in the damp night air. If the 6 hours of talk time on a single charge of the internal battery is not enough then bring along a spare battery which can be changed out in seconds. The provided standard accessories of a canvas carry bag with shoulder strap, an AC cord for charging, internal battery and a wired microphone with cord make this unit ready to go to work right from day one. The sleek design and hard molded rugged plastic design make this unit take being treated rough and still do the job year after year.
